

## KS-235-S

### Product Information

Chemical name 1,2-Bis-(3-methyl-phenoxy)ethane / 45-55%water-based slurry

Cas No. 54914-85-1

Chemical formula

### Physical Properties

| Properties                 | Method         | Value        |
|----------------------------|----------------|--------------|
| Appearance                 |                | White slurry |
| Color (as a solid)         | APHA           | 10-50        |
| Purity (as a solid)        | GC             | 98.0-100%    |
| Melting Point (as a solid) | Capillary Tube | 95.0-98.0°C  |

### Applications

Synthesizer for thermal recording media

### Registration

|        |         |             |
|--------|---------|-------------|
| Japan  | ENCS    | 3-3886      |
| USA    | TSCA    | active      |
| EU     | EC#     | 402-730-9   |
| China  | IECSC   | Registered  |
| Taiwan | TCSI    | Registered  |
| Korea  | K-REACH | 2011-3-4994 |

### Packing

200kg / Drum  
1,000kg / Container

How to store : Seal the container and store it avoiding direct sunlight, high temperatures (above 60°C), and conditions where water freezes (to prevent aggregation and sedimentation, it is desirable to keep it between 5°C and 25°C and stir gently). Wear protective gear when handling the product.

Please note that specifications and appearance may change without notice. The information, technical materials, and recommendations in this document are all based on experiments we trust, but we do not guarantee their accuracy or completeness. Users should determine whether the product suits their purposes before use and bear all associated risks and responsibilities. The seller's and manufacturer's only obligation is to replace proven defective products, and we disclaim any other responsibilities. Unless specified in a contract signed by the officers of the seller or manufacturer, we are not responsible for matters or recommendations not included in this document. Refer to the SDS and ensure safety and health considerations when handling.
