

O-PP

Product Information

Chemical name 2-Phenylphenol

Cas No. 90-43-7

Chemical formula

Physical Properties

<u>Properties</u>	<u>Method</u>	<u>Value</u>
Appearance		White solid
Melting Point	Capillary Tube	56-58 °C
Phosphorus concentration		13.4-14.4 %

Applications

synthetic resin raw materials
dye carriers
various chemical synthesis raw materials
disinfectants
preservatives
optical materials

Registration

Japan	ENCS	4-19
USA	TSCA	active
USA	CP65	active
EU	EC#	201-993-5
China	IECSC	Registered
Taiwan	TCSI	Registered
Korea	K-REACH	KE-02870

Packing

20kg / Paper bag [Flake]
500kg / Flexible container bag [Flake]

How to store : Store at room temperature, avoiding moisture. Wear protective gear when handling the product.

Please note that specifications and appearance may change without notice. The information, technical materials, and recommendations in this document are all based on experiments we trust, but we do not guarantee their accuracy or completeness. Users should determine whether the product suits their purposes before use and bear all associated risks and responsibilities. The seller's and manufacturer's only obligation is to replace proven defective products, and we disclaim any other responsibilities. Unless specified in a contract signed by the officers of the seller or manufacturer, we are not responsible for matters or recommendations not included in this document. Refer to the SDS and ensure safety and health considerations when handling.
